Planetary and Space Science
Volume 46

JANUARY

Bishop, J., Romani, P. N., Atreya, S. K. — **Voyager 2 ultraviolet spectrometer solar occultations at Neptune: photochemical modeling of the 125–165 nm lightcurves 1**

Sekanina, Z., Chodas, P. W., Yeomans, D. K. — **Secondary fragmentation of comet Shoemakey–Levy 9 and the ramifications for the progenitor's breakup in July 1992 21**

Lupishko, D. F., Di Martino, M. — **Physical properties of near-Earth asteroids 47**

Barucci, M. A., Doressoundiram, A., Fulchignoni, M., Florczak, M., Lazzarin, M., Angeli, C. — **Compositional type characterization of Rosetta asteroid candidates 75**

McKenna-Lawlor, S., Afonin, V. V., Kirsch, E., Schwingenschuh, K., Slavin, J. A., Trotignon, J. G. — **An overview of energetic particles (from 55 keV to > 30 Mev) recorded in the close Martian environment, and their energization in local and external processes 83**

Rosenberg, M., Chow, V. W. — **Farley–Buneman instability in a dusty plasma 103**

Planetary Pioneers
Delsemme, A. H. — **Recollections of a cometary scientist 111**

FEBRUARY/MARCH

Special Issue: TUNGUSKA 96

Foreword of the Tunguska issue 125

PART 1: 88 YEARS LATER: WHAT WE HAVE LEARNED FROM FIELD RESEARCH IN TUNGUSKA

Vasilyev, N. V. — **The Tunguska Meteorite problem today 129**

Goldine, V. D. — **Search for the local centres of the Tunguska explosions 151**

Nesvetajlo, V. D. — **Consequences of the Tunguska catastrophe: dendrochronoindication inferences 155**

Kolesnikov, E. M., Kolesnikova, N. V., Boettger, T. — **Isotopic anomaly in peat nitrogen is a probable trace of acid rains caused by 1908 Tunguska bolide 163**

Alekseev, V. A. — **New aspects of the Tunguska meteorite problem 169**

Huo, Q. L., Ma, P. X., Kolesnikov, E. M. — **Discovery of iridium and other element anomalies near the 1908 Tunguska explosion site 179**

PART 2: COMET OR ASTEROID? A COMPARISON BETWEEN RECENT AMERICAN AND RUSSIAN MATHEMATICAL MODELS FOR THE TUNGUSKA EXPLOSION

Sekanina, Z. — **Evidence for asteroidal origin of the Tunguska object 191**

Asher, D. J., Steel, D. I. — **On the possible relation between the Tunguska bolide and comet Encke 205**

Grigorian, S. S. — **The cometary nature of the Tunguska meteorite: on the predictive possibilities of mathematical models 213**

Hills, J. G., Goda, M. P. — **Damage from the impacts of small asteroids 219**

Korobeinikov, V. P., Shurshalov, L. V. Vlasov, V. I., Semenov, I. V. — **Complex modelling of the Tunguska catastrophe 231**

Lyne, J. E., Tauber, M. E. Fought, R. M. — **A computer model of the atmospheric entry of the Tunguska object 245**

Stulov, V. P. — **Gasdynamical model of the Tunguska fall 253**

Svetsov, V. V. — **Could the Tunguska debris survive the terminal flare? 261**

PART 3: WHAT DANGER FROM TUNGUSKA-LIKE OBJECTS? THE RISK FROM COSMIC IMPACTS WITH EARTH

Montanari, A., Campo Bagatin, A., Farinella, P. — **Earth cratering record and impact energy flux in the last 150 Ma 271**

Harris, A. W. — **Evaluation of ground-based optical surveys for near-Earth asteroids 283**

Muinonen, K. — **Discovery and follow-up simulations for small Earth-crossing asteroids 291**

Marsden, B. G., Williams, G. V. — **The NEO confirmation page 299**

Farinella, P., Menichella, M. — **The flux of Tunguska-sized fragments from the main asteroid belt 303**

Bottke Jr, W. F., Richardson, D. C., Love, S. G. — **Production of Tunguska-sized bodies by Earth's tidal forces 311**

Gurov, E. P., Gurova, E. P. — **The group of Macha craters in western Yakutia 323**

Colombetti, A., Ferrari, G., Nicolodi, F., Panini, F. — **Some metallic spherules in calcareous-marly sediments of the Romanoro Flysch, Sestola-Vidiciatico tectonic unit (Modena district, Northern Apennines, Italy) 329**

The Society for Interdisciplinary Studies (SIS) 341

Book Reviews

Koskinen, H. — **Physics of the Upper Polar Atmosphere by Askeir Brekke 343**

Bignami, G. F. — **Edwin Hubble—Mariner of the Nebulae by Gale E. Christianson 343**

Bignami, G. F. — **Particle Astrophysics by H. V. Klapdor—Kleingrothaus and K. Zuber 344**

Farinella, P. — **In Search of Planet Vulcan—The Ghost in Newton's Clockwork Universe by R. Baum and W. Sheehan 344**

APRIL

Mangold, N., Allemand, P., Thomas, P. G. — **Wrinkle ridges of Mars: structural analysis and evidence for shallow deformation controlled by ice-rich décollements 345**

Markiewicz, W. J., Skorov, Yu. V., Keller, H. U., Kömle, N. I. — **Evolution of ice surfaces within porous near-surface layers on cometary nuclei 357**

Breus, T. K., Pimenov, K. Yu., Izakov, M. N., Krymskii, A. M., Luhmann, J. G., Kliore, A. J. — **Conditions in the Martian ionosphere/atmosphere from a comparison of a thermospheric model with radio occultation data 367**

Bellucci, G., Pinori, S., Formisano, V. — **Imaging spectroscopy of the moon: data reduction-analysis techniques and compositional variability of the Mare Serenitatis–Tranquillitatis region 377**

Barbier, B., Chabin, A., Chaput, D., Brack, A. — **Photochemical processing of amino acids in Earth orbit 391**

Kotsarenko, A. N., Kotsarenko, N. Ya., Silich, S. A. — **Low frequency surface waves in the magnetized dusty plasma 399**

Kopp, A., Birk, G. T., Otto, A. — **On the formation of Io-induced acceleration regions related to Jovian aurora 405**

Das, G. C., Tagare, S. G., Sarma, J. — **Quasipotential analysis for ion-acoustic solitary waves and double layers in plasmas 417**

Bharuthram, R., Rosenberg, M. — **A note on the generation of fluctuations by Space Shuttle exhaust in the ionosphere 425**

Kotsarenko, N. Ya., Koshevaya, S. V., Stewart, G. A., Maravilla, D. — **Electrostatic spatially limited solitons in a magnetised dusty plasma 429**

Ifedili, S. O. — **Cosmic-ray intensity variations during the Forbush decreases, 2–15 May 1969 435**

El-Borie, M. A., Duldig, M. L. Humble, J. E. — **Galactic cosmic ray modulation and the passage of the heliospheric current sheet at Earth 439**

Gunnlaugsson, H. P. Hviid, S. F., Knudsen, J. M., Madsen, M. B. — **Instruments for the Magnetic Properties Experiments on Mars Pathfinder 449**

Schröder, W. — **Hermann Fritz and the foundation of auroral research 461**

Letter

Cosmovici, C. B., Montebugnoli, S., Orfei, A., Pogrebenko, S. Cortiglioni, S. — **The puzzling detection of the 22 GHz water emission line in Comet Hyakutake at perihelion 467**

Book Reviews

Perozzi, E. — **Theory of Interplanetary Flights by G. A. Gurzadyan 471**

Brack, A. — **Mars and the development of life (Second Edition) by Anders Hansson 472**

MAY

Steel, D. — **Distributions and moments of asteroid and comet impact speeds upon the Earth and Mars 473**

Bellucci, G. — **Spectral diversity and compositional implications of Montes Haemus and Serenitatis/Tranquillitatis region on the moon from imaging spectroscopy data 479**

Dobrijevic, M., Parisot, J. P. — **Effect of chemical kinetics uncertainties on hydrocarbon production in the stratosphere of Neptune 491**

Farrugia, C. J., Biernat, H. K., Erkaev, N. V. — **The effect of the magnetopause shapes of Jupiter and Saturn on magnetosheath parameters 507**

Brookes, C. J. — **Analysis of the variation in eccentricity of the orbit of Cosmos 185 rocket, 1967–104B 515**

Dougherty, M. K., Dunlop, M. W., Prange, R., Rego, D. — **Correspondence between field aligned currents observed by Ulysses and HST auroral emission 531**

Shukla, P. K., Rahman, H. U. — **Instability of electrostatic dust-cyclotron waves and associated wake potential 541**

Special section: HYAKUTAKE COMET PAPERS

Marco, O., Encrenaz, T., Gendron, E. — **First images of a comet with adaptive optics 547**

Bertaux, J. L., Costa, J., Quémerais, E., Lallement, R., Berthé, M., Kyrölä, Schmidt, W., Summanen, T., Makinen, T., Goukenleuque, C. — **Lyman-alpha observations of comet Hyakutake with SWAN on SOHO 555**

Gérard, E., Crovisier, J., Colom, P., Biver, N., Bockelée-Morvan, D., Rauer, H. — **Observations of the OH radical in comet C/1996 b2 (Hyakutake) with the Nançay radio telescope 569**

Wouterloot, J. G. A., Lingmann, A. Miller, M., Vowinkel, B., Winnewisser, G., Wyrowski, F. — **HCN, CO, CS, CN, and CO^+ observations of comet Hyakutake (1996 B2) 579**

Laffont, C., Rousslot, P., Clairemidi, J., Moreels, G. — **Condensations and diffuse source of C_2 in comet Hyakutake C/1996 B2 585**

Wegmann, R., Schmidt, H. U., Lisse, C. M., Dennerl, K., Englhauser, J. — **X-rays from comets generated by energetic solar wind particles 603**

Book Review
Southwood, D. — **Introduction to Geomagnetic Fields by Wallace H. Campbell 613**

JUNE/JULY

Griv, E. — **Local stability criterion for the Saturnian ring system 615**

Vidal-Madjar, A., Lecavelier des Etangs, A., Ferlet, R. — **β Pictoris, a young planetary system? A review 629**

Scheeres, D. J., Marzari, F., Tomasella, L., Vanzani, V. — **ROSETTA mission: satellite orbits around a cometary nucleus 649**

Denchev, P., Magnusson, P., Donchev, Z. — **Lightcurves of nine asteroids, with pole and sense of rotation of 42 Isis 673**

Hong, Y., Fegley Jnr., B. — **The sulfur vapor pressure over pyrite on the surface of Venus 683**

Cordelli, A., Farinella, P., Rossi, A. — **The influence of the fragmentation threshold on the long term evolution of the orbital debris environment 691**

ELISMA experimenters — **The wave complex on the Mars-96 orbiter: ELISMA 701**

Special Section: Mars Instrumentation

Linkin, V., Harri, A.-M., Lipatov, A., Belostotskaja, K., Derbunovich, B., Ekonomov, A., Khloustova, L., Kremnev, R. Makarov, V., Martinov, B., Nenarokov, D., Prostov, M., Pustovalov, A., Shustko, G., Järvinen, I., Kivilinna, H., Korpela, S., Kumpulainen, K., Lehto, A., Pellinen, R., Pirjola, R., Riihelä, P., Salminen, A., Schmidt, W., Siili, T., Blamont, J., Carpentier, T., Debus, A., Hua C. T., Karczewski, J.-F., Laplace, H., Levacher, P., Lognonné, Ph., Malique, C., Menvielle, M., Mouli, G., Pommereau, J.-P., Quotb, K., Runavot, J., Vienne, D., Grunthaner, F., Kuhnke, F., Musmann, G., Rieder, R., Wänke, H., Economou, T., Herring, M., Lane, A., McKay, C. P. — **A sophisticated lander for scientific exploration of Mars: scientific objectives and implementation of the Mars-96 Small Station 717**

Lognonné, P., Zharkov, V. N., Karczewski, J. F., Romanowicz, B., Menvielle, M., Poupinet, G., Brient, B., Cavoit, C., Desautez, A., Dole, B., Franqueville, D., Gagnepain-Beyneix, J., Richard, H., Schibler, P., Striebig, N. — **The seismic OPTIMISM experiment 739**

Kuhnke, F., Menvielle, M., Musmann, G., Karczewski, J. F., Kügler, H., Cavoit, C., Schibler, P. — **The OPTIMISM/MAG Mars-96 experiment: magnetic measurements onboard landers and related magnetic cleanliness program 749**

McKay, C. P., Grunthaner, F. J., Lane, A. L., Herring, M., Bartman, R. K., Ksendzov, A., Manning, C. M., Lamb, J. L., Williams, R. M., Ricco, A. J., Butler, M. A., Murray, B. C., Quinn, R. C., Zent, A. P., Klein, H. P., Levin, G. V. — **The Mars Oxidant experiment (MOx) for Mars '96 769**

Harri, A.-M., Lunkin, V., Polkko, J., Marov, M., Pommereau, J.-P., Lipatov, A., Siili, T., Manuilov, K., Lebedev, V., Lehto, A., Pellinen, R., Pirjola, R., Carpentier, T., Malique, C., Makarov, V., Khloustova, L., Eposito, L., Maki, J., Lawrence, G., Lystsev, V. — **Meteorological observations on Martian surface: met-packages of Mars-96 Small Stations and Penetrators 779**

Zent, A. P., Quinn, R. C., Madou, M. — **A thermo-acoustic gas sensor array for photochemically critical species in the Martian atmosphere 795**

Sauke, T. B., Becker, J. F. — **Stable isotope laser spectrometer for exploration of Mars 805**

Wright, I. P., Pillinger, C. T. — **Mars, Modulus and MAGIC. The measurement of stable isotopic compositions at a planetary surface 813**

Letter

Schultz, R. A. — **Multiple-process origin of Valles Marineris basins and troughs, Mars 827**

AUGUST

Special Issue: ASTEROIDS, COMETS, METEORS 1996—IV

Voelzke, M. R., Matsuura, O. T. — **Morphological analysis of the plasma structures of comet P/Halley 835**

Morgan, T. H., Killen, R. M. — **Production mechanisms for faint but possibly detectable coronae about asteroids 843**

Enzian, A., Cabot, H., Klinger, J. — **Simulation of the water and carbon monoxide production rates of comet Hale–Bopp using a quasi 3-D nucleus model 851**

Sarmecanic, J., Fomenkova, M., Jones, B. — **Modeling of mid-infrared dust emission from P/Swift-Tuttle 859**

Lindblad, B. A. — **The nodal, the "new" and the "old" maximum of the Perseid meteor stream 865**

Cevolani, G., Gabucci, M. F., Grassi, G., Trivellone, G. — **Structural aspects of meteoroid streams observed by a forward scatter radar system 869**

Klačka, J., Pittich, E. M. — **Origin of the Taurid meteor stream 881**

Tichá, J., Tichý, M., Moravec, Z. — **Minor planets at Kleť—from discovery to numbering 887**

Gammelgaard, P. — **(51) Nemausa observed at near zero phase angle 893**

Pauwels, T. — **Astrometric reductions of ESO-Schmidt plates 899**

Michel, P. — **Dynamical behaviour of Near-Earth asteroids in the terrestrial planet region: the role of secular resonances 905**

Kimura, H., Mann, I., Mukai, T. — **Influence of dust shape and material composition on the solar F-corona 911**

Giblin, I. — **New data on the velocity–mass relation in catastrophic disruption 921**

Hughes, D. W., WIlliams, I. P. — **Sibling sandblasting and the smoothness of Gaspra and Ida 929**

Piironen, J., Muinonen, K., Nousiainen, T., Sasse, C., Roth, S., Peltoniemi, J. I. — **Albedo measurements on meteorite particles 937**

Gallardo, T., Ferraz-Mello, S. — **Dynamics in the exterior 2:3 resonance with Neptune 945**

REGULAR PAPERS

Nascimento, L. F. C., Mota, R. P., Valenca, G. P., Teixeira, J. C., Algatti, M. A., Honda, R. Y., Bortoleto, J. R. R. — **A N_2: CH_4: H_2O DC glow discharge plasma probed by optical and electric techniques: significance to the radiation chemistry of Titan's upper atmosphere in the presence of meteoritic water 969**

Skorov, Yu. V., Rickman, H. — **Simulation of gas flow in a cometary Knudsen layer 975**

Brunini, A., Huton, R. G. — **The cometary bombardment on the primitive asteroid belt 997**

Verani, S., Barbieri, C., Benn, C., Cremonese, G. — **Possible detection of meteor stream effects on the lunar sodium atmosphere 1003**

Goldstein, R. M., Goldstein, Jr, S. J., Kessler, D. J. — **Radar observations of space debris 1007**

Badruddin — **Interplanetary shocks, magnetic clouds, stream interfaces and resulting geomagnetic disturbances 1015**

Personal Reviews

Y. Kozai — **Development of celestial mechanics in Japan 1031**

Dollfus, A. — **History of planetary science. The Pic du Midi Planetary Observation Project: 1941–1971 1037**
